

SUPPORT YOUR RECRUITMENT

Finding the best job candidates and quickly identifying the most qualified ones among hundreds of received job applications has never been an easy task, especially in the areas of Agile and Lean...

DEVELOP YOUR STAFF

Staff retention, higher performance and levels of satisfaction at work are proven to heavily depend on how invested their employer is in the internal development opportunities, capability building and career progression.

WHAT AGILE ROLES ARE YOU HIRING FOR?

JoinAgile Portal allows you to create profile records for the Agile job candidates you'd like to be tested for the role they've applied for. All test results will be stored as part of their profiles for recruitment purposes, or creation of Personal Development Plans...

USE OUR TEST MODULES FOR CAPABILITY MAPPING

Developing your staff starts with learning what skills and knowledge your people need to excel in their specific Agile roles. JoinAgile test modules can serve as "role templates" and capability metrics your staff could be measured up against, on demand.

REVIEW TEST RESULTS, MAKE BETTER DECISIONS

Our role-based test modules are relevant, up-to-date, and challenging enough to help you obtain a more objective and all-rounded picture of your job candidates. Detailed reports provide hiring recommendations, and help you ask more informed questions at the further stages of your job interviews.

TEST RESULTS LEAD TO DEVELOPMENT PLANS!

Our competency test results are detailed enough to highlight the knowledge gaps, potential impact of any lacking skills, and suggest the ways to develop or obtain the missing knowledge and skills. All of this fits nicely in creation of well-educated plans for professional development in many Agile roles.
